

Alexey Gavrosh

Senior Software Engineer (Golang, PHP)
Minsk · Remote / Hybrid / Office

alexey.gavrosh.dev@gmail.com | +375 (29) 693-4129 | t.me/AlexeyGavrosh | linkedin.com/in/alexey-gavrosh-dev | github.com/AlexeyGavrosh

SKILLS

Backend	Go, PHP 8, Laravel, Symfony, WordPress, Drupal, PHPUnit
Frontend	Vue.js, Nuxt (SSR), React, JavaScript, jQuery
Data & queues	PostgreSQL, MySQL, ClickHouse, Redis, RabbitMQ, Apache Kafka, OpenSearch, MeiliSearch
APIs	REST / SOAP, OpenAPI (Swagger), Microservices, WebSockets
DevOps	Docker, Kubernetes, CI/CD, Argo CD, Nginx, Linux, Git

OPEN SOURCE

Open Source Projects **github.com/AlexeyGavrosh**
PHP / Laravel / Symfony projects and portfolio snapshots

- **shop-admin-bot**: read-only Telegram admin bot in Go for a Laravel/MySQL webshop — button statistics, push notifications on new orders, customer chats, tickets and reviews; Docker, CI with integration tests
- **rss-aggregator**: Telegram RSS/Atom aggregator in Go — worker-pool scheduler, feed autodiscovery, PostgreSQL with embedded idempotent migrations, dedup; Docker Compose
- **creoserver-portfolio**: open snapshots of production e-commerce systems — Laravel API, Vue / Nuxt storefront
- **task-manager**: Symfony 7 application — Docker (nginx / php-fpm / PostgreSQL), Doctrine ORM, token-authenticated JSON API, domain events, console commands
- **ymaps-org-reviews**: Laravel + Vue 3 SPA for collecting and analyzing Yandex Maps organization reviews (queue-based parsing)

EXPERIENCE

Maxbitsolution · FinTech
Sep 2024 – Aug 2026

Senior Software Engineer (Golang, PHP)

- Migrated microservices from PHP to Go — ported high-load platform services to Go, preserving sync (REST / SOAP) and async (Kafka) contracts
- **Stack:** Go, PHP 8, Laravel, WordPress, PostgreSQL / MySQL / ClickHouse, Redis, Kafka, RabbitMQ, OpenSearch, Swagger, Docker, Kubernetes (Argo CD), Vue / React
- High-load microservice platform: dozens of services, horizontal scaling — payment processing and iGaming content delivery; decomposed the monolith and moved heavy operations to async pipelines — lower API latency, resilient to peak loads
- Built search and analytics on OpenSearch / ClickHouse — interactive search over millions of records
- Optimized SQL and indexes under load (EXPLAIN, composite indexes, partitioning); sped up game updates (400k items) from 15 min to under 1 min; raised test coverage (PHPUnit) to 80%
- End-to-end CI/CD: Swagger contracts → build → Argo CD → Kubernetes; canary releases, zero-downtime deploys
- Admin panels and dashboards on Vue / React; WordPress plugins and integrations; AI/ML integrations; technical interviews and onboarding

Ontid · E-commerce
Dec 2020 – Sep 2024

Fullstack Developer

- **Stack:** PHP, Symfony, Laravel, Vue.js, Nuxt (SSR), MySQL, MeiliSearch, Mollie, PayPal, SendCloud, WebSockets
- Full delivery cycle of an international e-commerce platform family: core backend, customer portal, Nuxt SSR storefront
- Payments (Mollie, PayPal), EU VAT, SendCloud logistics, MeiliSearch search, realtime updates via WebSockets
- Document flow automation, 1C / SFTP data exchange; architecture decisions for distributed applications

7745.by · E-commerce
Nov 2018 – Nov 2020

Web Developer (Drupal / PHP / JS / Laravel)

- **Stack:** PHP, Drupal, Laravel, jQuery, MySQL, SOAP, 1C
- One of the largest Belarusian online retailers: 20+ warehouses, unified catalog
- Search logic and business rules engine; bank payment and credit systems
- Marketplace API / SOAP integrations; 1C ERP (XML / CML / YML), FTP

Early career (2010 – 2018): engineer roles in electronics and robotics — service engineer at Leica (medical and research equipment), robotic complex maintenance at Minsk Electrotechnical Plant, microelectronics production (OJSC Integral).

EDUCATION & LANGUAGES

2015 Belarusian State University of Informatics and Radioelectronics — Computer Technologies, Information Security

2021 Academy of Public Administration under the President of the Republic of Belarus — International Relations

Languages: Russian — native · English — B1
